3M Health Care
Surgical Drape Packs

# Absorbent, Impervious
## and Cost Effective

## 3M™ Steri-Drape™ Surgical Drape Packs provide a convenient solution for everyday draping

- **Save Time**

  WIth procedure specific packs, the most commonly used drapes are in one pack, eliminating the need to select several drapes from the store room prior to the operation.

- **Easy Ordering and Stock Control**

  Using Surgical Drape packs makes monitoring and ordering of replacement products easier and more efficient.

- **Absorbent**

  The absorbent qualities of the fabric controls and contains fluid, reducing clean-up time, potential exposure to body fluids and risk to staff from fluid on the floor.

- **Impervious**

  The fluid control and impervious features of the fabric mean that only a single layer of drapes is required. 3M surgical drapes are impervious to liquid strikethrough which can help to reduce bacterial transfer and subsequent contamination of the surgical site.

- **Adhesion**

  3M is a leader in adhesive technology and has applied this expertise to provide surgical drapes with consistently reliable adhesion to the skin.

3M drapes feature an absorbent, impervious material throughout the drape to incorporate the true critical zone… the entire sterile field.
