3M™ ChartScript MD™ Software

Speak. Click. Sign.

3M ChartScriptMD Software easily lets you create, edit and complete patient documentation. With SpeechMagic™ speech recognition software, clinical templates, and dictation, 3M ChartScriptMD can help streamline your workflow by increasing standardisation and documentation availability.

The result? Less hassle for you. More time for your patients.

- Reduce transcription costs
- Improve documentation while saving time
- Increase care provider mobility and control
- Speed communication for better patient care
- Reduce administrative burden

The 3M advantage

- Gives clinicians the necessary patient information to create, edit or authenticate clinical documentation
- Allows clinicians to choose customisable templates, simple user prompts, selection lists and merge fields to build documentation
- Provides flexible choice of front-end or back-end speech recognition
- Reduces errors of omission and recoding time for hospitals and professional services
- Increases compliance with information governance and patient safety standards
- Reduces A/R days through improved documentation turnaround

3M ChartScriptMD at work

SUMMA Health System was searching for a secure transcription system that would empower its clinicians to produce medical documents in seconds. SUMMA's staff trusted 3M to help them implement 3M ChartScriptMD. 3M's strategy of rolling out 3M ChartScriptMD department by department was met with overwhelming success at SUMMA. "The physicians using 3M ChartScriptMD for their procedure notes just love it," says Sandy Hirsch at SUMMA. **"Our turnaround time has dropped from five or six days to about six hours!"**

AtlantiCare, a 553-bed teaching hospital in New Jersey, wanted to address rising transcription costs while reducing turnaround time. They turned to 3M for a template-driven documentation creation system designed for clinicians. As one busy orthopaedic surgeon notes, "With 3M ChartScriptMD we can create accurate, detailed documents as we complete each procedure. I just locate the template for the particular procedure and make patient-specific changes in the variables. **It is ready for me to review and sign electronically in less than 30 seconds.** 3M ChartScriptMD and 3M™ Electronic Signature Authentication Software contribute to efficiency, effectiveness and safety."

3M™ ChartScriptMD ™ Software

Features and Benefits

- Dictate and sign in a single session
- Enjoy multiple methods of documenting patient care: front-end or back-end speech recognition, clinical templates and/or traditional dictation
- Reduce dictation and turnaround times and increase accuracy and completeness
- Merge data from other patient information systems to eliminate re-keying of patient information and potential errors
- Automatically allows clinicians to build document through patient stay, using *say-it-once* technology, to create electronic discharge summaries for example
- Use customised text inserts with standardised text blocks to describe routine clinical procedures and assessments
- Decrease casenote deficiencies

Integration

3M ChartScriptMD integrates with:

- **3M™ ChartScript™ Software -** Transcribes and distributes dictation and speech-recognised documents, decreasing document turnaround time
- **3M™ Electronic Signature Authentication Software -** Sign and edit patient documentation anytime from virtually anywhere
- **3M™ ChartFact™ Software -** Tracks the status of incomplete patient documents and provides a worklist of documents that need completing
- **3M™ ChartView™ Software -** View patient information, clinical data, transcribed documents and even paper records online in real time
- **3M™ VoiceScript™ Software -** Lets you dictate anywhere, anytime via phone, PC or PDA

Documentation

- Create customised patient documents for the patient record based on templates and other user defined options
- Use automated, integrated tools to distribute patient referrals instantly - by fax, email or printed copy
- Use with 3M ChartScript for full report distribution

Security

To maintain appropriate access to sensitive data, 3M applications provide user-specific security features:

- Individual user ID and password logon
- Automatic logoff after user-defined period of system inactivity
- Facility-defined access levels and assignments, including the ability to exclude access to records based on specific record characteristics (such as patient type)
- Audit trail capabilities within the application that provide detailed information about user activity
- Integration with security features of industry-standard servers and databases to capture additional audit data

Technology

Built on platforms designed to enhance current operating environments while remaining open to future technology, 3M solutions are:

- Compatible with industry-standard technology such as Microsoft® Windows® XP
- HIPAA-enabled applications that operate using today's standard PC and networking technology
