

### **Dynatel Line Tester Troubleshoots Inside Wiring for Voice Signal Viability Testing**

AUSTIN - June 21, 2006 - The 3M Dynatel line tester 946DSP can save you time and money through improved productivity and reduced trouble tickets. It is a full-featured unit for POTS and inside wiring testing, enabling CATV installation and maintenance crews to efficiently qualify and troubleshoot inside wiring for voice signal viability testing.

With the push of a single button, the easy-to-use Dynatel line tester performs a wide range of tests to analyze twisted-pair problems, which can be stored and uploaded to a PC for efficient record keeping.

The 3M tester has a graphical user interface with a user-friendly, icon-based display of test results. Information is shown in a backlit, high-resolution/high-contrast LCD display.

Weighing only one pound, the 946DSP test set is housed in a lightweight, hand-held rugged case for portability and ease of handling.
