

Getting the High Resolution Files

Practice Marketing Resource Center

Once you have decided you would like to produce an ad, postcard, etc, your artist or printer will need high resolution files to create your material.

If this is your first time requesting these materials, you will need to obtain permission to access the files from 3M Unitek. The first step is to click on the link near the item you want that says High Resolution file.

A pre-addressed e-mail template will open requesting access to the files. Fill in your practice name and information and type in any additional information you would like, and click “send”.

You will receive a response during normal business hours which will provide the web address (link) where these files can be obtained. Please understand that only 3M Unitek customers who offer these products to their patients will be granted access. This e-mail link can also be used at any time if you have questions about the Resource Center.

After obtaining the link address, you or your artist/printer can use the link to download the high resolution files needed. You will be able to forward the link to your supplier using e-mail. If you need to download more materials, the link will still be good. You do not need to re-contact 3M Unitek for additional links. If you lose the link address, simply click on the e-mail link as if it were a first time request and send us a request to resend.

Important Note:

All materials obtained through the Practice Marketing Resource Center remain the property of 3M and you are using them with permission as a customer of 3M. Do not transfer these materials to others for their use or use them in ways other than shown on this site. You will be requested to sign an Image Use Agreement before being sent the link to the high resolution files.
