

Course Content.

This two hours IncognitoTM course will give you an introduction to the IncognitoTM Lingual Bracket System. You will get basic knowledge about The IncognitoTM System and examples for clinical applications. The IncognitoTM Bracket System allows you to realize your treatment objectives which are established prior to treatment beginning. Every single IncognitoTM Bracket ist produced individually for each patient using modern CAD / CAM technology.

This leads to an extreme high patient comfort due to the very low bracket design and biomechanical benefits. The precision of the Bracket slots and the prefabricated archwires allow perfect torque and angulation control.

The focus of the course will be:

- 1) Introduction and laboratory process
- 2) Different options with the Incognito™ System
- 3) Different Ligatures and Elastics
- 4) Arch Sequences
- 5) Bonding and debonding
- 6) Clinical cases

Dr. Esfandiar Modjahedpour from Duesseldorf- Germany
