

3M™ Stamark™ Road Marking Tape Series A310AWS

- An ideal solution to patching and repair work - simple to apply with no specialist training or equipment required
- Replace broken lines immediately after works finish to restore enforcement and safety standards
- Can be used to create symbols for urban environments
- Inbuilt net helps to increase durability and increases resistance to tearing in high shear situations
- A310AWS achieved R3, Rw2, S2 when tested to BS EN 1436 after 1 million wheel hits
- No primer or special preparation is required so the tapes can be applied quickly and directly onto the road surface by hand or with one of 3M's manual or automatic tape applicators*
- Available in white and yellow

* Primerless applications can be used when the weather conditions satisfy the climatic requirements of the associated 3M Product Bulletin.

3M™ Stamark™ A310AWS (white) and A311AWS (yellow) Road Marking Tapes are ideal for repair and patching works or anywhere excellent road presence and durability are required. There's no need for primer, and only a sweep of the road surface is needed before application can take place*.

3M™ Stamark™ Road Marking Tape Series A310AWS

Hand Application Guidelines

1 Ensure the road is dry and the air and road temperature is above 10°C

3 Roll the Stamark directly onto the road surface

5 Tamp the Stamark thoroughly to ensure good adhesion to the road using a tamper cart (90kg load) or truck tyre.

2 Sweep the road where the Stamark is to be applied, removing any large stones or loose debris

4 Cut the Stamark to the required length with a sharp knife

6 Open the road to traffic
