

# Lars Christensen Orthodontics In-Office Courses 2012

## Orthodontic Education Programme

Presented by Dr. Lars Christensen

Venue: Lars Christensen Orthodontics  
69-71 Banbury Road  
Oxford  
OX2 6PE

Supported by

**3M** Unitek

## ABOUT THE COURSES

Since 2009, Dr. Lars Christensen has run a programme of one, two and three day orthodontic courses, at his practice in Oxford. These courses are aimed at specialist orthodontists who are both experienced and new users of the SmartClip™ and Clarity™ SL Appliance Systems, as well as conventional MBT™ Appliance users.

For 2012 Dr. Christensen, will deliver three new MBT focused courses, combining observation in clinic at his Oxford based practice with complementary theory.

## COURSE OUTLINES

### MBT™ System Diagnosis and Treatment Planning *(two day course)*

The first course will begin with a review of the MBT philosophy. Subsequently Dr. Christensen will present techniques for case assessment and treatment planning including the dental VTO. The participants will observe cases in the early part of treatment covering direct and indirect bracket placement, aspects of levelling and alignment and a discussion on wire technology. An interactive session will give the course participants a chance to practice treatment planning and a practical part will introduce indirect bonding on a case selected by the participants to enhance the learning objective.

### MBT™ System Treatment Mechanics *(two day course)*

The course will focus on the essential elements of efficient treatment. The essentials in accurate bracket placement, successful bonding, anchorage management, and low force sliding mechanics covered in the course above will be reviewed.

Through case examples and theory Dr. Christensen will present treatment options for effective sagittal correction in both Class II and Class III cases.

The course will detail treatment options in adults as well as in adolescence. A theoretical overview of fixed and removable Class II correctors will be presented.

Interactive treatment planning sessions along with patient presentations will allow for group discussions and information exchange between the participants.

### MBT™ System Finishing, Detailing and Retention *(two day course)*

The course will address the final stages of treatment, demonstrated through case examples and treatment. Finishing techniques to improve outcomes will be covered along with retention protocols. In the final course the focus will be on correction of transverse problems. Dr. Christensen will discuss treatment options for adults as well as adolescent patients.

Examples of surgical and non-surgical strategies will be highlighted along with a discussion on the available evidence for expansion treatment.

## Profile: Dr Lars Christensen

Lars completed his dental qualification in Copenhagen in 1990, followed by a PhD in 1993. He then continued his education at Guy's and St Thomas' in London and gained his MSc in 1996, which was followed by MOrth at the Royal College of Surgeons in Edinburgh in 1997.

Lars currently has a very successful private practice in Oxford,. He has lectured extensively in Europe, USA, Middle East and Asia.

Lars is a member of the British Orthodontic Society, the European Orthodontic Society, the British Dental Association, the Cranio-facial Society of Great Britain and Ireland, the World Federation of Orthodontics and the American Association of Orthodontics. He is also an affiliate member of Edward H Angle Society in California.
