

Lars Christensen Orthodontics In-Office Courses 2013

Presented by Dr. Lars Christensen

Venue: Lars Christensen Orthodontics
69-71 Banbury Road
Oxford
OX2 6PE

Supported by

3M Unitek

ABOUT THE COURSES

Since 2009, Dr. Lars Christensen has run a programme of orthodontic courses, at his practice in Oxford.

For 2013 Dr. Christensen, will deliver two new MBT focused courses and one aesthetics course, combining observation in clinic at his Oxford based practice with complementary theory.

These courses are aimed at specialist orthodontists.

COURSE OUTLINES

MBT™ Update Course 1 - Diagnostics and the Sagittal Dimension *(two day course)*

A two-day in office course aiming to update current and prospective MBT users on the MBT technique. Dr. Christensen will present techniques for case assessment and treatment planning, including the dental VTO.

After demonstrating precision indirect bonding techniques, aspects of sagittal correction mechanics will be detailed with case material.

An interactive session will give the course participants a chance to practice treatment planning and a practical part will introduce indirect bonding on a case selected by the participants to enhance the learning objective.

MBT™ Update Course 2 - Vertical and Transverse Corrections *(two day course)*

In the second two-day course, the focus is vertical and transverse problems. Dr. Christensen will discuss treatment options for adults, as well as growing patients. Examples of surgical and non-surgical strategies will be highlighted along with a discussion on the available evidence for expansion treatment.

Interactive treatment planning sessions along with patient presentations will allow for group discussions and information exchange between the participants.

Finally, finishing techniques to improve outcomes will be covered along with retention protocols.

The Aesthetic Patient *(two day course)*

The aesthetic demands from our patients are continually increasing. Over two days, Dr. Christensen will discuss and illustrate aesthetic treatment options in orthodontic practice. Treatment options with ceramic appliances, lingual appliances and aligners will be illustrated and evaluated. Careful analysis of the pros and cons of the various treatment modalities will be presented along with discussion on patient expectation management techniques. On the second day, Dr. Robert Simmons, specialist in prosthodontics will join us for a view from the restorative dentist's perspective. Dr. Simmons will illustrate where and how we can improve our joint efforts to better patient management.

Profile: Dr. Lars Christensen

Lars completed his dental qualification in Copenhagen in 1990, followed by a PhD in 1993. He then continued his education at Guy's and St Thomas' in London and gained his MSc in 1996, which was followed by MOrth at the Royal College of Surgeons in Edinburgh in 1997.

Lars has a very successful private practice in Oxford. He has lectured extensively in Europe, USA, Middle East and Asia. Lars is a member of the British Orthodontic Society, the European Orthodontic Society, the British Dental Association, the World Federation of Orthodontics and the American Association of Orthodontics. He is also an affiliate member of Edward H Angle Society in California.
