

PRE-RELEASE

Quick, easy to use, accurate, versatile

3M ChartScriptMD Software for Radiology lets the busy radiologist create reports and provide radiological findings to referring physicians quickly and accurately. 3M's **Critical Phrase Identification** feature highlights key clinical words and phrases, making it easier to proof completed reports and improve accuracy.

Now radiologists can select the methodology that works best for them, whether it's using report templates accessed by touch or voice, speech recognition, or dictation. Plus, it integrates seamlessly with the major PACS applications on the market.

3M™ ChartScriptMD™ Software for Radiology

- Streamline workflow with CPT®-generated reports with easy-to-use custom “text inserts”
- Create consistent, high-quality reports using text inserts, touch-screen selected templates, standard dictation, or speech recognition
- Enhance report quality and consistency with technology-driven workflow based on user preferences
- Improve communication between radiologists with real-time instant messaging

The challenge

Radiologists are particularly sensitive to any extra time required to complete a document. They want a solution that supports their own dictation methods with easy-to-use technology that can reduce turn-around times and help automate the workflow. They are all for cutting transcription costs, but not at the expense of adding cumbersome, non-intuitive steps to their work processes.

The 3M solution

3M ChartScriptMD Software for Radiology is a system that allows you to customize your radiology reporting solution to work the way your radiologists prefer. Choose between standard dictation or speech recognition coupled with hundreds of timesaving CPT®-generated report templates. Intuitive features and functionality allow users to easily customize reports, manage worklists, create “notes” reminders, and capture and include images in their reports. The instant messaging feature allows users to “chat” in real time with other department members. 3M ChartScriptMD for Radiology gives you many choices, making it a solution radiologists in your department can agree on.

The 3M ChartScriptMD Software for Radiology:

- Enables multiple users to customize and streamline the creation and editing of documents in as little time as possible
- Integrates dictation and report templates into the image review process to maximize report generation efficiency
- Reduces steps to complete dictation with flexible workflow
- Provides a unique “reading-room-ready” user experience that allows the radiologist to quickly create, edit, sign and prepare reports for distribution

3M™ ChartScriptMD™ Software for Radiology

The 3M advantage

This robust solution promotes efficient, accurate and flexible radiology report generation and **was developed by a leading radiologist for radiologists**. It is designed to work with leading PACS applications and automatically transfers demographic information on the patient and exam between systems, eliminating the need for the provider to manually enter the information or swipe a barcode. Single sign-on also helps reduce the traditional steps required before dictating.

A versatile solution

Your organization has the option of integrating 3M ChartScriptMD Software for Radiology with the **3M™ ChartScript™ Software**, which is used for report distribution. Powerful speech recognition microphones are also an available option. Together, these products provide:

- Multiple dictation technologies, including digital voice or immediate (front-end) and/or deferred (back-end) speech recognition
- Ability to work with either touch screen monitors or standard dictation microphones using directional or computer controls as well as soft keys for additional functionality
- Versatile report templates so radiologists can choose how to create reports
- Documents that are auto-populated with demographic information
- Integrated report distribution

PRE-RELEASE

Up-to-date technology and security

Built on a platform designed to enhance current operating environments while remaining open to future technology, 3M solutions:

- Are compatible with industry-standard operating systems such as Microsoft® Windows® XP and Windows® 7 (recommended)
- Are HIPAA-enabled applications that operate using today's standard PC and networking technology
- Use Nuance's SpeechMagic™ speech recognition technology
