PRINTER NOTES
 See included barcode file attached for specifications; the printer is responsible for using the appropriate bar width.
 If this file utilizes a raster image containing spot channels for color separations, the PSD file used to create these channels has been included; chokes and spreads have not been applied; screen angles have not been chosen, and LCR has not been applied.
 For 3M, please request artwork from the contact listed in the Item Spec, using the artwork request Word document.
